

The background of the entire page is a photograph of a rural landscape. In the foreground, a metal gate with horizontal bars is partially open, revealing a gravel path leading into a grassy field. To the right of the gate, there is a wooden post-and-rail fence and some yellow-flowered bushes. In the distance, there are rolling hills and mountains under a sky filled with large, orange and yellow clouds, suggesting a sunset or sunrise.

HINGE SETS

Australia's largest range of rural hinge sets.

There's hinge sets for; steel posts, timber posts, and concrete posts.

With options to; bolt-on, bolt-thru, screw-on, and weld-on.

Farm Fences. **Sorted.**

SCREW-ON TIMBER POST HINGE SET

CODE	GATE	POST	BARCODE	BOX QTY
FG1	25NB	Any Size	 9 348326 00S035	5

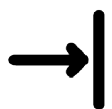

10MM AUGER

For a quick, easy installation, use a HA10165 auger (page 53).

Coach screws are 12mm, the 10mm auger makes it easy to get the screw in, but leaves enough for the screw to grip.

HINGES

TIMBER GATE STRAP AND GUDGEON HINGE

CODE	GATE	POST Ø	THREAD Ø	BARCODE	BOX QTY
FG7450	Timber Gate	<410mm	20mm		5

ADJUSTABLE

Adjustable once installed.
Fits posts up to 410mm.

HEAVY DUTY

Heavy duty 20mm thick
thread. Suitable for up to
800kg gate weight.

450mm

ANTI-SAG

Large 50mm Ø washers ensure
the hinge won't pull through
the post, and prevent the gate
sagging as the post ages.

FLEXIBLE

Fits all timber gates, with
over 180 opening angle.

BOLT-THRU TIMBER POST HINGE SET

CODE	GATE	POST	BARCODE	BOX QTY
FG2	25NB	<350mm	 3 48326 003482	5

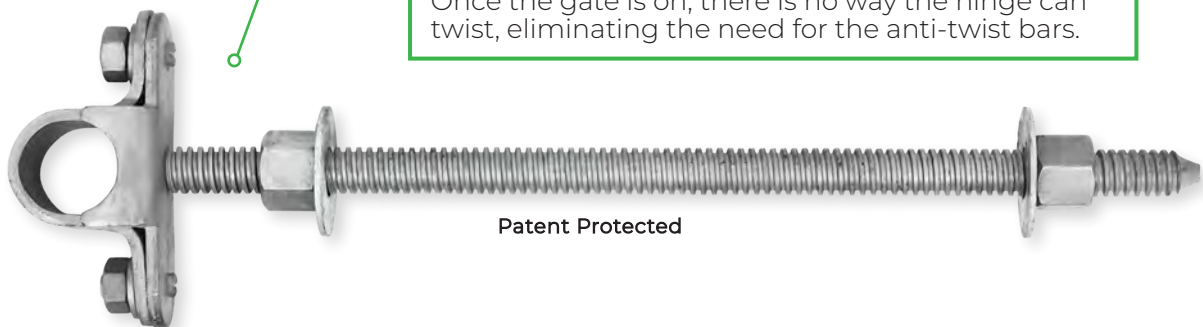

FASTFIT

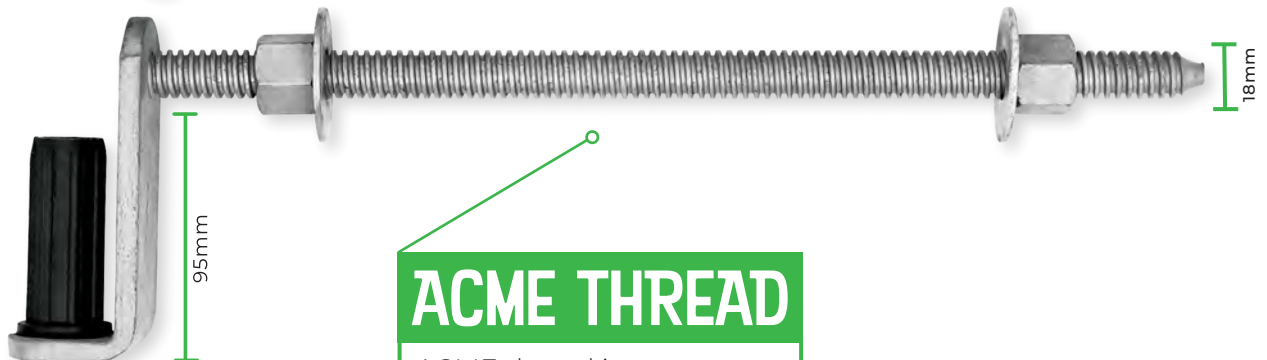

Top hinge features a top saddle and backing plate that comes with threads pre-pressed in.

This allows for a fast and easy install: Lift the gate up, place the saddle over, and then tighten the nuts. **Only 2 holes need to be drilled = Half the Holes = Fast Install.**

Once the gate is on, there is no way the hinge can twist, eliminating the need for the anti-twist bars.

Patent Protected

GET IT LOW

The design allows the gate to swing very low to the ground without having to drill the post hole low.

ACME THREAD

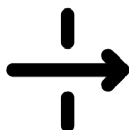

ACME thread is stronger and wider than standard threads.

The wide thread allows the nut to travel further per revolution compared to traditional threads. The trapezoidal shape gives it strength, meaning stripping is eliminated.

FG6150	25NB	150NB	 9 348326 004366	5

SIMPLE

The FG6 can be installed in minutes, with no welding or drilling. All you need is a shifter.

Because this is a bolt-on gate kit, it can be taken off, adjusted, turned around, moved up or down at any time, easily.

ANTI-BRUISE

The interlocking design of the FG6 is smooth, with no protrusions. It's one less thing that could cause damage to your valuable stock.

STRONG

There are tens of thousands of FG6's all around Australia, all doing one thing really well. Smoothly swinging gates.

They do this effortlessly, thanks to their unique design and the 20% extra body strength they have over alternative kits.

The 8.8 high tensile bolts ensure threads won't be stripped.

THE VIDEO

ADJUSTABLE

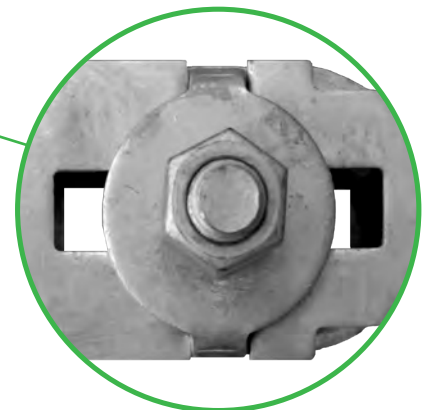

The pin can be adjusted and locked in 1 of 3 pre-set locations with the lockable washer.

50mm of horizontal pin adjustment = 140mm of vertical movement at gate end (12ft).

LOCKABLE WASHER

Our patent-protected lockable washer, locks the gudgeon pin into place, ensuring the gate won't sag over time. This makes it the strongest adjustable pin on the market.
