

PRODUCT GUIDE

ROTECH RURAL

FARM FENCES. **SORTED.**

AUSTRALIAN FAMILY OWNED

100% Australian owned and operated by a family just like yours. We are committed to supporting the vibrant, hardworking people who make rural Australia thrive, and truly understanding the needs and challenges of fencing in these areas.

EXPERT FENCING SUPPORT

We're here with a smile and the expertise to guide you every step of the way. Our sales and support team aren't just knowledgeable; they're passionate about helping you find the perfect solutions for any fencing challenge. Whether it's a question about installation, advice on maintenance, or any other inquiry, we're all ears and always here to help.

100% PRODUCT GUARANTEE

We're more than just about selling gate hardware; we're about making sure customers are absolutely satisfied with every purchase. If for any reason you're not entirely pleased with a purchase—whether it's a matter of performance, quality, or simply not meeting the specific needs, we're committed to making it right.

STOCKISTS COUNTRY WIDE

Our products are accessible from almost any local rural store across Australia. With over 800 stockists nationwide, we've made it easy for you to find Rotech. Or if you want a quote first, we have a simple online quoting system where you can get an instant quote from your preferred stockist.

WE LISTEN TO YOUR FEEDBACK

We work closely with Australian farmers to constantly adapt and improve our innovations to better suit farmers needs. We are committed to making ourselves accessible to you and are always looking for ways to connect and hear feedback.

STAYTIGHT FENCE ENDS

Australia's quickest, easiest, and most adjustable range of fence end kits.

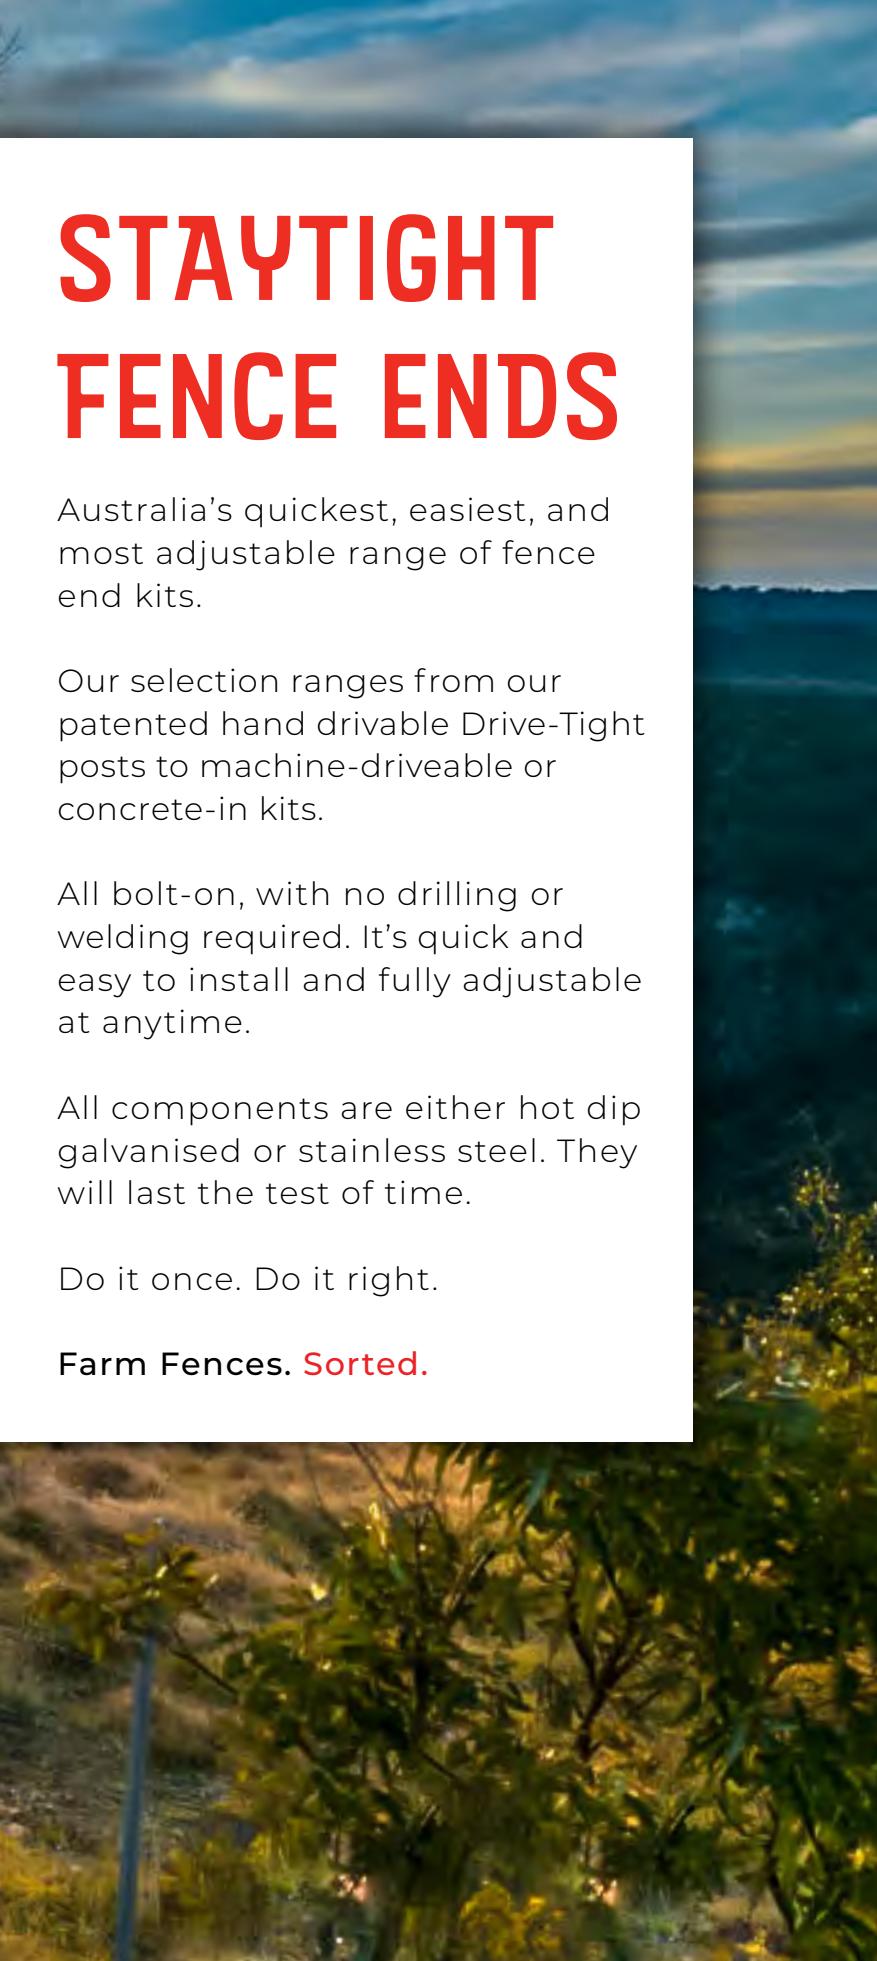

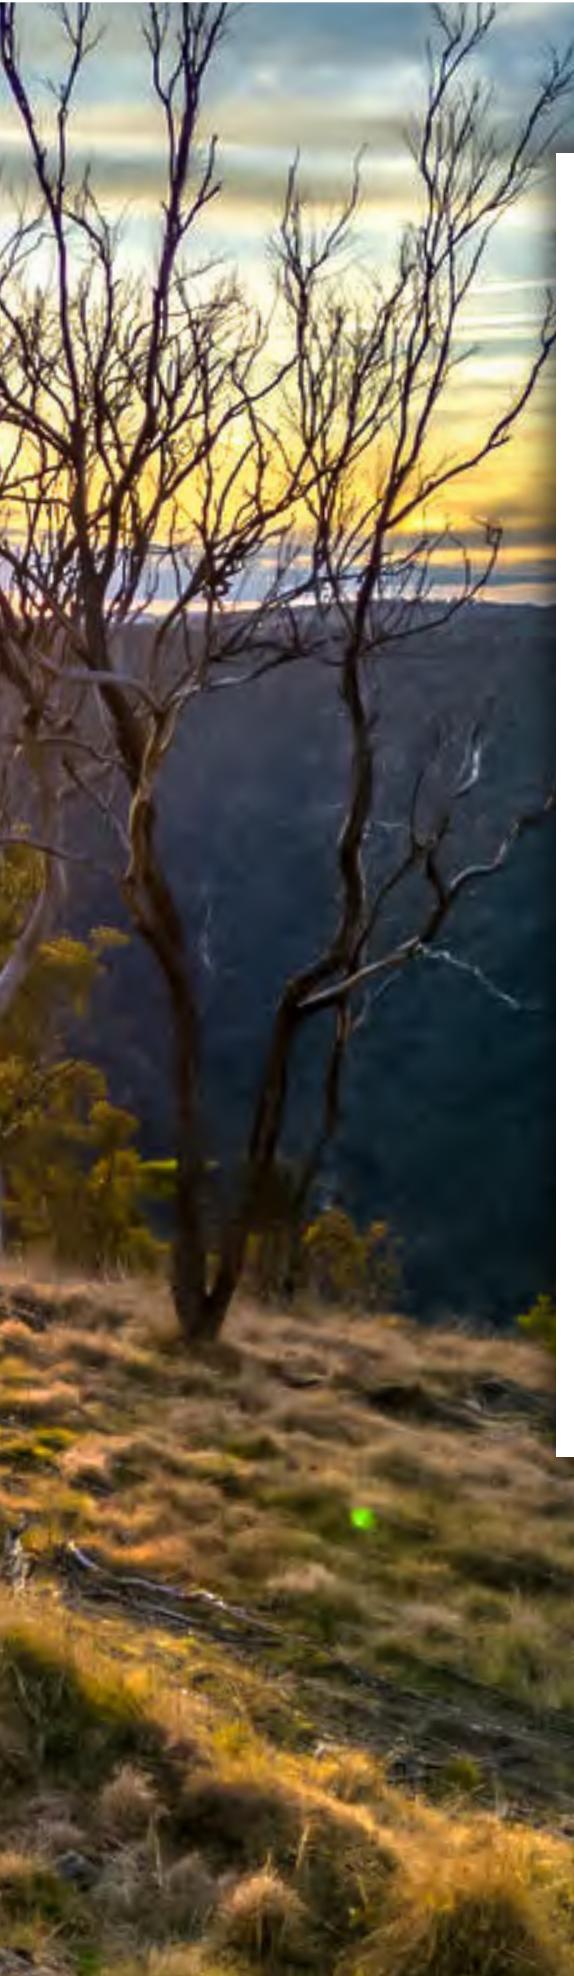

Our selection ranges from our patented hand drivable Drive-Tight posts to machine-driveable or concrete-in kits.

All bolt-on, with no drilling or welding required. It's quick and easy to install and fully adjustable at anytime.

All components are either hot dip galvanised or stainless steel. They will last the test of time.

Do it once. Do it right.

Farm Fences. Sorted.

CHOOSING THE RIGHT

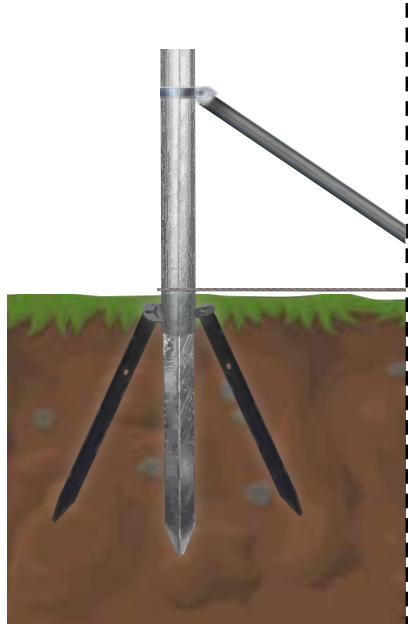

STAY TIGHT® END ASSEMBLY

THE RANGE

DRIVE TIGHT®

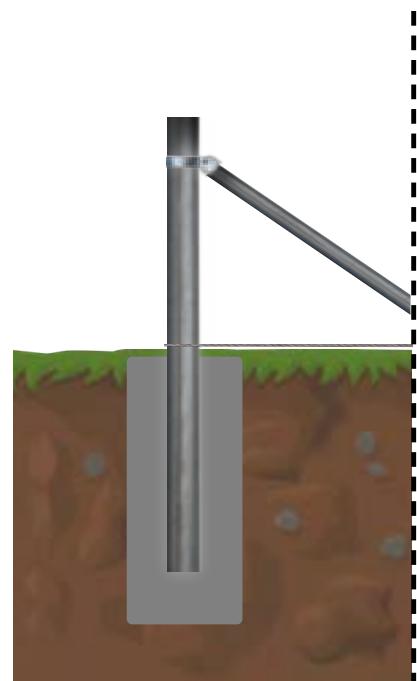

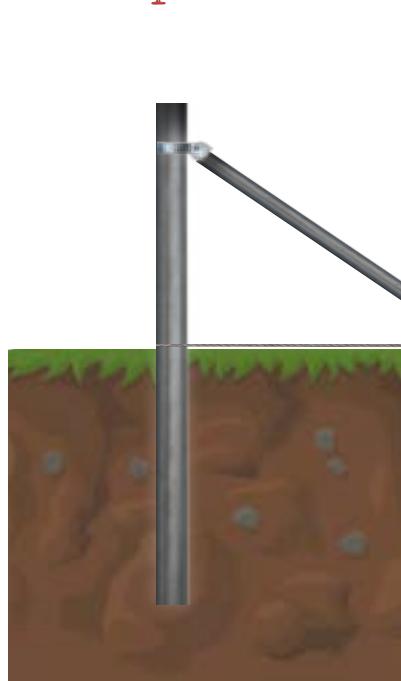

HAND-DRIVEABLE

MACHINE
DRIVEABLE

CONCRETE-IN

When finding the **STAYTIGHT End Assembly** that will work best for you, it is important you consider each of the following factors.

TIME - How much is your time worth? How quickly do you need the project completed?

MATERIALS, EQUIPMENT, SPECIALISED SKILLS - Do you have all the materials and equipment needed? What skilled labour do you have access to?

SITE ACCESS - How accessible is the site? Can you get your machinery there? Consider also the travel required to get to the project location.

COST - The product cost is only one part of the total cost. How much will labour, equipment, and other materials required to complete the project, cost?

We have created a product selection guide to help you find the right **End Assembly** solution for your needs. Using the **LOW-TO-HIGH** matrix, you can compare how each factor ranks across the available options.

LOWEST

HIGHEST

**██████████ TIME**

DriveTight posts can be installed in under 5 minutes, and then the post is immediately ready to strain a fence.

██████████ MATERIALS, EQUIPMENT, SPECIALISED SKILLS

A DriveTight Post only requires a hand driver to install and the DriveTight lugs are highly recommended, which require 2x short star pickets.

██████████ SITE ACCESS

You only need to be able to carry a 20kg post and a handheld driver to the site. Best choice for poor site access.

██████████ END ASSEMBLY COST

This end assembly has the highest material cost but is often the most cost effective as it requires the least time, labour, and equipment of any option.

MACHINE-DRIVEABLE**██████ TIME**

The post is installed with a pneumatic driver in around 10mins, then the post is immediately ready to strain a fence

██████████ MATERIALS, EQUIPMENT, SPECIALISED SKILLS

A pneumatic post driver large enough to drive an 80NB or 100NB Post 1200mm into the ground. Most handheld drivers are not powerful enough to do this.

██████████ SITE ACCESS

Your site will need to be accessible with machinery and a driver. If travel is required, consider the transportation of equipment.

██████ END ASSEMBLY COST

This assembly is in the middle of our price range however if you don't own the required equipment the cost of hire must be considered.

CONCRETE-IN**██████████ TIME**

The concrete needs to be set overnight before a fence line can be strained. Therefore 2 site visits minimum will be required.

██████████ MATERIALS, EQUIPMENT, SPECIALISED SKILLS

Digging Tools / Machinery, Concrete Mixer and Concrete.

██████████ SITE ACCESS

Must be an accessible area as equipment will be required onsite for digging the post holes and concreting.

██████████ END ASSEMBLY COST

This assembly is the lowest costing in our range, however, it takes the most time and labour which will affect the overall cost significantly.

DRIVER OPTIONS:

HAND DRIVER

PNEUMATIC DRIVER

HYDRAULIC/PTO DRIVER

POST DRIVER

The DRIVE-TIGHT hand driver measures 810mm and weighs 21kg. It gives you enough weight to drive the post in, without being too heavy.

THE POST

It's a 100NB (114.3 O.D) hot dip galvanised pipe with a 4.5mm wall thickness and is available at 2100mm or 2400mm long. It should be driven in to just above the anchor lugs.

ANCHOR LUGS

Clip in lugs on 45° angles, allow half-length pickets to be driven in. This dramatically increases ground anchorage.

THE PENETRATOR

The pointed end penetrates the ground with ease, meaning faster installs and less wear and tear on equipment.

STAYTIGHT

THE ONLY END ASSEMBLY KITS TO INCLUDE -

1) STAINLESS STEEL TENSION CABLE AND EYE-BOLT

The stainless steel tension assembly makes the **Premium Rotech Assemblies** the most corrosion resistant in Australia!

The superior quality means they are better able to withstand salt-air, have a higher fire resistance and last significantly longer.

2) LOKDOWN LUGS

CREATED IN RESPONSE TO REAL-WORLD TESTING & CUSTOMER FEEDBACK!

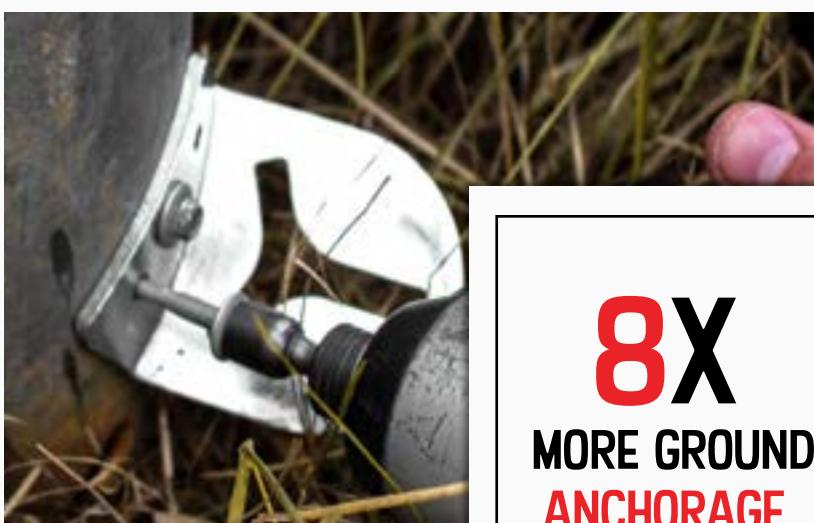

Over the past few years we have experienced some severe droughts and major flooding events. We have gained valuable knowledge by observing which fences remained intact and which ones didn't.

That is why we have created the LokDown Lugs!

The LokDown lugs give the post 8x more ground anchorage. This means the **Premium Rotech Assemblies** have significantly more support in the soil and increased resistance. This allows them to withstand much greater force.

	PPSK50	<250mm	50NB	3250mm	1200mm - 2000mm	 9 348326 005271	10

Includes: Stay, Stay Connector, Footplate, & Stainless Steel Eyebolt Tension Cable

TRADITIONAL PINE POST FENCE ENDS WITH A TWIST!

Installing a traditional pine post fence end is labour intensive and back breaking work. The StayTight timber post system can dramatically reduce the effort, but still give you the traditional look.

- 1) Installing our steel stay is simple—just drill a single 16mm hole, unlike the time-consuming box mitre needed for a pine stay. Then, the capping disc not only finishes the stay neatly but also stops it from pushing through the post. A win-win solution! (pic. 1)
- 2) The stainless steel tension cable drops straight over pine posts up to 250mm. Meaning, drilling through the post is no longer required which adds life to the post by decreasing the chance of rot. (pic. 2)

ADAPT-A FIT TECHNOLOGY - PATENT PROTECTED INNOVATION

The new Adapt-a Fit technology means that our connector tongue can conform to any stay wall. As you insert the connector, depending on the stay wall thickness, the slit will compress to the exact fit. This standardises your operation allowing you to keep your connectors consistent and reliable.

>

>

STRONG

The Twist-Tight post and stay connectors have been designed specifically for the demands of farm fences, not lighter duty applications like security fences.

A high tensile (8.8) M12 bolt secures the tongue and clamp onto the post. A bolt is secure, unlike a pre-drilled hole.

The 6mm thick tongue goes 125mm down inside the stay, this significantly increases the strength and effectiveness.

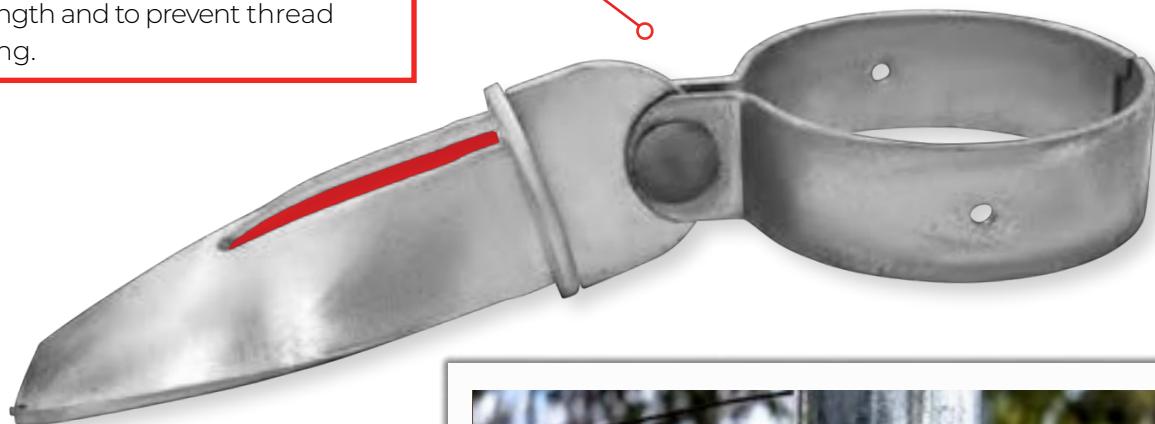

ADJUSTABLE

The Twist-Tight clamp allows for adjustment at any time, unlike alternative options, where the stay has been welded or inserted into pre-drilled holes.

HIGH TENSILE BOLT

High tensile 8.8-grade nut and bolt for strength and to prevent thread stripping.

Patent Protected

WHAT IS NOMINAL BORE (NB)?

The bore is the hollow section of the pipe. Nominal refers to the approximate measurement of the bore.

There are regulations that govern the outside diameter (O.D) of pipe. So, to allow for different wall thicknesses the inside diameter (I.D) of the pipe has to vary. The outside doesn't change, the inside does...nominal bore.

Pipe was originally measured in inches. 100NB pipe works out to be exactly 4.5 inches ($4.5(\text{inches}) \times 25.4(\text{mm/inch}) = 114.3\text{mm}$). That's why the O.D can't be simple number like 100mm.

PIPE DIAMETER CHART

NOMINAL BORE (NB)	SECTION	WALL THICKNESS (MM)	OUTSIDE DIAMETER (O.D)

BOLT-THRU TIMBER POST HINGE SET

CODE	GATE	POST	BARCODE	BOX QTY
FG2	25NB	<350mm	 9 348326 003482	5

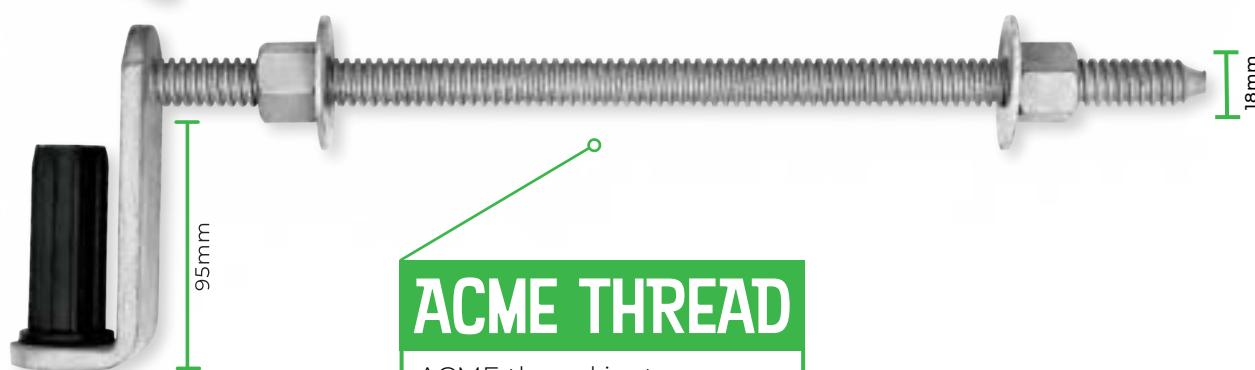

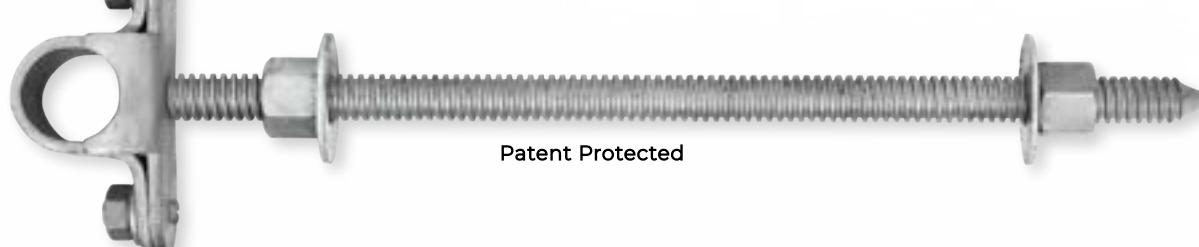

FASTR FIT

Top hinge features a top saddle and backing plate that comes with threads pre-pressed in.

This allows for a fast and easy install: Lift the gate up, place the saddle over, and then tighten the nuts. **Only 2 holes need to be drilled**
= Half the Holes = Fast Install.

Once the gate is on, there is no way the hinge can twist, eliminating the need for the anti-twist bars.

ACME THREAD

ACME thread is stronger and wider than standard threads.

The wide thread allows the nut to travel further per revolution compared to traditional threads. The trapezoidal shape gives it strength, meaning stripping is eliminated.

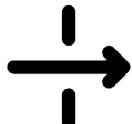

GET IT LOW

The design allows the gate to swing very low to the ground without having to drill the post hole low.

BOLT-ON ADJUSTABLE ROUND POST HINGE SET

CODE	GATE	POST	BARCODE	BOX QTY
FG6080	25NB	80NB	 9 348326 003352	5
FG6100	"	100NB	 9 348326 003360	5
FG610032	32NB	"	 9 348326 003363	5
FG6150	25NB	150NB	 9 348326 004364	5

SIMPLE

The FG6 can be installed in minutes, with no welding or drilling. All you need is a shifter.

Because this is a bolt-on gate kit, it can be taken off, adjusted, turned around, moved up or down at any time, easily.

ANTI-BRUISE

The interlocking design of the FG6 is smooth, with no protrusions. It's one less thing that could cause damage to your valuable stock.

STRONG

There are tens of thousands of FG6's all around Australia, all doing one thing really well. Smoothly swinging gates.

They do this effortlessly, thanks to their unique design and the 20% extra body strength they have over alternative kits.

The 8.8 high tensile bolts ensure threads won't be stripped.

THE VIDEO

Patent Protected

LOCKABLE WASHER

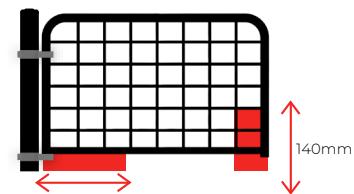

Our patent-protected lockable washer, locks the gudgeon pin into place, ensuring the gate won't sag over time. This makes it the strongest adjustable pin on the market.

ADJUSTABLE

The pin can be adjusted and locked in 1 of 3 pre-set locations with the lockable washer.

50mm of horizontal pin adjustment = 140mm of vertical movement at gate end (12ft).

WELD/SCREW-ON TOP SADDLE BACKING PLATE HINGE SET

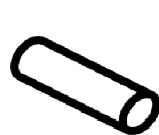

CODE	GATE	POST Ø	BARCODE	BOX QTY
FG11	25NB	Any Size	 9 348326 004908	5

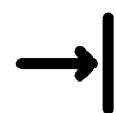

SIMPLE

Pre-pressed threads lock the top saddle and backing plate in place, making installation easy.

By keeping the kit as compact as possible, you get more strength and less chance of stock damage from protrusions.

SECURE & SIMPLE

If security is a concern, this is the hinge set for you. Once this hinge is welded onto the post, the gate isn't going anywhere.

For a very affordable price, you get a simple, versatile, and robust hinge set. Peace of mind doesn't need to come with a premium.

SMOOTH FRONT EDGE

When the latch is mounted, the hook is inside the gate, not protruding out from the gate frame.

ADJUSTABLE

Our longer chain allows for adjustment as the gate way openings may increase over time.

VERSATILE

With our 700mm long chains you can use the same latch to go around the post, for double gates, and three-way gates.

NO SWINGING

Attach our latch to your gate then latch it to your fence when opening it and stop swinging.

**DUAL CUTTERS
PROVEN TO
LAST 2-3X
LONGER**

HIGH STRENGTH CHROMIUM ALLOY

10x Stronger than Augers made from high carbon steel.

AMAZING FEED RATE

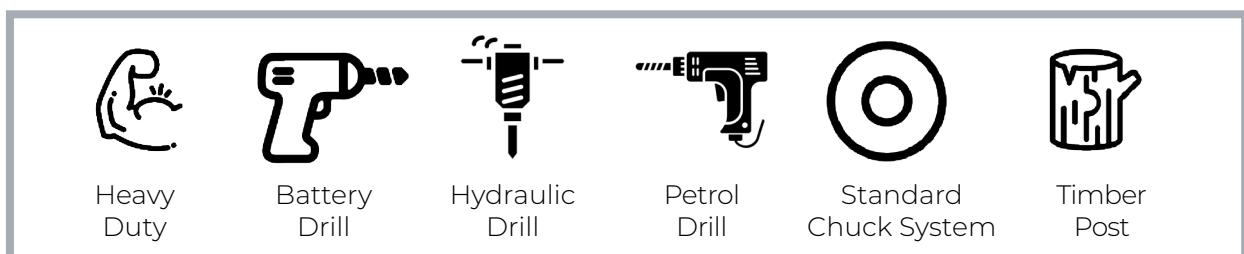

Drills 400mm in a single pass without clogging, in dry timber.

DUAL CUTTING POWER

The dual cutting tip on our 16mm and larger Augers significantly increases the cutting speed and keeps the edges sharp longer.

EASY TIP SHARPENING

With a round or half-round file, like traditional augers.

STOCKYARD FITTINGS

An essential range of weld-on
hinges, latches, catches, cleats,
drop pins, and castor wheels.

HEAR FROM OUR CUSTOMERS

"I had a fence to build in a very rocky steep terrain. The End Assembly kit made the job a breeze, no machinery was required which was also a big saving. I'm not a professional and on steep ground I could have an end assembly completed in 15 minutes. I was very impressed with the product."

CHARLES HOP - LISMORE, NSW

"I used the 22mm auger bit from Rotech Rural and it went through a 200mm square Ironbark post with ease. It was beautiful to use. I use a cordless drill and had no issues with it whatsoever. I've used a lot of bits in my time, and Rotech's are the most impressive I've ever used."

DARREN, DARREN SKEWIS FENCING - BEAUDESERT, QLD

"I like the simplicity of using the Rotech products, because you do not need any welders or many power tools. Just nice and easy and can be taken away if fence is not needed."

JARROD ANDREWS - DENILINUIN, NSW

*Pictured Slim, Horsham VIC
