

POST & RAIL FENCING

FARM FENCES. SORTED.

AUSTRALIAN FAMILY OWNED

100% Australian owned and operated by a family just like yours. We are committed to supporting the vibrant, hardworking people who make rural Australia thrive, and truly understanding the needs and challenges of fencing in these areas.

EXPERT FENCING SUPPORT

We're here with a smile and the expertise to guide you every step of the way. Our sales and support team aren't just knowledgeable; they're passionate about helping you find the perfect solutions for any fencing challenge. Whether it's a question about installation, advice on maintenance, or any other inquiry, we're all ears and always here to help.

100% PRODUCT GUARANTEE

We're more than just about selling gate hardware; we're about making sure customers are absolutely satisfied with every purchase. If for any reason you're not entirely pleased with a purchase—whether it's a matter of performance, quality, or simply not meeting the specific needs, we're committed to making it right.

STOCKISTS COUNTRY WIDE

Our products are accessible from almost any local rural store across Australia. With over 800 stockists nationwide, we've made it easy for you to find Rotech. Or if you want a quote first, we have a simple online quoting system where you can get an instant quote from your preferred stockist.

WE LISTEN TO YOUR FEEDBACK

We work closely with Australian farmers to constantly adapt and improve our innovations to better suit farmers' needs. We are committed to making ourselves accessible to you and are always looking for ways to connect and hear feedback.

WHY PICK RAILTIGHT

5 MINUTE INSTALL

NO CUTTING, NO GRINDING, NO WELDING, NO CLEANING, NO PAINTING

SAFE FOR HORSES & OTHER LIVESTOCK

The brackets smooth, sleek design presents an **anti-bruise finish**. Minimizing the risk of injury to horses and livestock.

HIGH QUALITY FINISH

The **fully enclosed design** ensures a finished look and no welding minimises the risk of corrosion and touch up paint. This design quality reflects a **professional installation standard**.

QUICK, EASY, REPAIR

Replace damaged rail in 10 minutes. Simply unscrew the bracket. Slide off the damaged rail and install a new length.

UNIQUE CUT-OUT ALLOWING
FOR 40° ADJUSTMENT.

40°

0°

-40°

“ The cut-out compensates for the elevation change which saves a lot of time, no welding and measuring angles! They come up a treat! ”

JEREMY - ARMIDALE RURAL SERVICES

“ Used on both timber and steel they saved us weeks of work! We were able to get all the rails level, sitting within 1mm of each other. They made the project more accurate and faster. Extremely impressed! ”

MG STEEL

Kate Ramm - NSW

Powder coated her RailTight fence
and the result is stunning!!

HOW TO INSTALL THE CATTLE RAIL END BRACKET

1 INSTALL THE POSTS. YOU CAN USE CONCRETE OR DRIVE IN.

We recommend 100-80 NB round or 75-100 RHS for steel posts.

Set a string line for the top of your posts for extra guidance - Trim down any that are too tall.

Remember to swap out tek screws when using timber posts.

2 MARK THE HEIGHT YOU WANT TO PLACE THE RAILS.

Measure from the top of the post to ensure rails are parallel.

However if on a slope, run an angled string line from the top of the slope to the bottom to ensure the rails are installed in line.

3 SCREW ON YOUR FIRST END BRACKET.

Fasten the first two tek screws diagonally across corners for top stability.

Bracket cut-out facing,
UPWARDS FOR DOWNWARD SLOPE.

Bracket cut-out facing,
DOWNWARDS FOR UPWARD SLOPE.

4 PLACE THE RAIL ONTO THE 1ST BRACKET. SLIDE OTHER END OF THE RAIL INTO NEXT BRACKET.

When concreting, install rails as you go, brace the post, then concrete once everything is in place. Otherwise, to make sure your spacing is accurate, lay out the posts and mark their exact lengths to account for variation.

5 SLIDE THE RAIL AND 2ND BRACKET INTO PLACE, AND SCREW IN USING THE SCREWS PROVIDED.

If on flat ground, check rail with a level.

REPEAT STEPS 3-5 FOR EACH RAIL.

6 FOR ADDED STRENGTH.

Add an extra screw into the side of your bracket through to the rail.

NOTE

WHEN SPACING OUT YOUR NEW POST & RAIL FENCE. FIRST INSTALL THE TOP RAIL 50-100MM FROM THE TOP.

- If installing 3 rails or more, space the rails evenly from the top rail.
- If installing just 2 rails, install your 2nd rail halfway down.
